Software Developer (m/f/d) for embedded software

Full time – permanent contract – immediate start of work – in Idstein/Taunus, Germany

What you can expect from us:

- Demanding, varied tasks with your own creative scope
- Extensive induction and individual career planning with your own training budget
- Attractive social benefits, including company pension plans and capital-forming schemes
- Modern workplace and flexible working hours (flexitime model)

Your duties:

- In this challenging key position you develop our innovative measuring instrument software
- You head for progress, know what is happening on the market and have the chance to shape development with us.
- The software development (Linux operating system) according to the latest technological standards and customer requirements is just as much in your hands as the consulting and cooperation with our specialist departments
- In addition, you control the integration of third-party software and plan and monitor the schedule
- Of course, this also includes the preparation of specifications, documentation

That's why you:

- Software Development is your passion! You have sound experience in the field of software architecture and know embedded software development well (programming language C, C++).
- In addition, to a degree in computer science, you are also interested in physical interrelationships
- You are a competent partner, know-how carrier and development specialist
- This varied and challenging task requires initiative and strategic thinking!
