

innomatec GmbH is a well-known name in the market. Our know-how is highly estimated world-wide in all branches. Since 1983 we are a successful, worldwide growth-strong enterprise, developing and manufacturing function and density test equipment for famous companies like Daimler, Bosch, Mahle, Siemens, etc. We have developed unrivaled innovative technologies and you find our locations in China, Brazil, India and 18 other countries.

innomatec develops, designs and builds more than 30 years of testing machines to control serial products for leak testing for the automotive industry: e. g. brake lines, fuel , engines, headlights, for medical technology: dialysis systems, catheters, for the gas industry: gas controls, gas and water meters, white goods: kitchen appliances, electric toothbrushes, irons etc. The products range from manual work to fully automatic test bench. Our customers are well known companies from various industries (e. g. automotive or household appliances), who appreciate our expertise and know-how.
